Army

Provision of Services - Health Facility

Army

Provision of Services - School based

Army

Dental Outcomes

- 6 days per week for 10 weeks
- 362 Patients seen
 - 52 military
 - 310 civilian
 - 96% of school children screened
 - 40% of school children completed treatment
- Much greater child caries experience (85%) than literature suggested (61%) for indigenous children

Army

Dental Outcomes

■ Extractions ■ Hygiene ■ Direct Restorations ■ Hall Crowns

Provision of equivalent of 4 years of dental services

BUT

Still seeing 10 patients a day during the last week of the trip!

Army

Lessons Learnt

- Skills deficit (garrison vs remote community dentistry)
 - Oral surgery
 - Paediatric services
 - Dental management of complex medical conditions
- 'One shot' dentistry for low patient compliance
- Community involvement to develop familiarity and rapport
- It takes time and effort to foster community's trust
- Effect of reputation on patient flow
