

## FDI Members Survey on Antibiotic Resistance

The dental professional has an essential role in keeping antibiotics working by tackling antibiotic resistance. The FDI Pledge on antibiotic resistance sets out ways in which dental organisations can play their part: <https://www.fdiworlddental.org/antibiotic-resistance-needs-tackling-immediately-across-dentistry>

To identify good practice, shared learning, and opportunities for additional support among FDI members, we are interested in how your organisation has responded to the Pledge.

	Already signed	Only just signed	Not yet signed
<b>Has your organisation signed the Pledge?</b> [Check via this website: <a href="https://www.fdiworlddental.org/antibiotic-resistance-needs-tackling-immediately-across-dentistry">https://www.fdiworlddental.org/antibiotic-resistance-needs-tackling-immediately-across-dentistry</a>			
<b>Who is your organisation's named point of contact for antibiotic resistance and/or the Pledge?</b>			
<b>Are dentists represented on your country's AMR national action plan body?</b> (circle one answer) YES / NO / UNSURE			

With respect to the Pledge, please tell us about action you have taken so far, actions you have planned and any lessons learned or barriers encountered so far. In this first year of the Pledge, you may not have much yet to report. If you have no action delivered or planned on an element of the Pledge, please select 'Not Yet'.

This survey will run each year so that you can tell us about your organisation's programme for tackling antibiotic resistance as it evolves over time. For each Pledge commitment in the tables below, please tick one box

Pledge Commitments	Action delivered	Action planned	Not yet
<b>1. Awareness raising</b>			
a. Make a clear and public commitment to tackling antibiotic resistance			
b. Communicate to the general public about antibiotic resistance and appropriate dental antibiotic use in dentistry			
c. Identify learning opportunities for dental professionals and other health professionals on antibiotic resistance, appropriate dental antibiotic use and oral health promotion for infection prevention			
Please tell us more about how you delivered these commitments or about your plans:			

	Action delivered	Action planned	Not yet
<b>2. Infection prevention and control</b>			
a. Advocate timely 'access for all' to oral healthcare to prevent dental infections			
b. Promote evidence-based guidelines on the prevention and control of infections in dentistry			
c. Support education and interventions on oral hygiene and low-sugar diet advice to prevent dental infections			
Please tell us more about how you delivered these commitments or about your plans:			

	Action delivered	Action planned	Not yet
<b>3. Antibiotic stewardship</b>			
a. Advocate for dentistry to be included within national action plans on antimicrobial or antibiotic resistance			
b. Engage in delivering national action plans through dental antibiotic stewardship programmes, including national and local approaches that involve audits of dental antibiotic use			
c. Participate in the development of evidence-based guidelines on dental antibiotic use			
d. Encourage the inclusion of antibiotic resistance and stewardship in dental curricula and continuing education programmes			
Please tell us more about how you delivered these commitments or about your plans:			

<b>Overarching feedback</b>	
Tell us about your lessons learned, enablers or barriers to delivery and how we can support you more
