

# WHO World Health Assembly 79 (WHA79)

## Promote Health

### Agenda item 15.2 Well-being and health promotion

Documents [A79/5](#) and [EB158/2025/REC/1](#)

### FDI & IADR Statement

FDI and IADR welcome the report on well-being and health promotion and its emphasis on cross-sectoral collaboration.

With nearly 60% of the working-age population employed<sup>1</sup>, workplaces are key settings for disease prevention and health promotion. Oral diseases affect 3.7 billion people worldwide<sup>2</sup> and cost the global economy an estimated US\$710 billion annually<sup>3</sup>. Integrating oral health into workplace well-being strategies is therefore both a public health and economic imperative.

FDI's new *Oral Health at Work* report, grounded in country experiences, identifies practical pathways to translate policy into action through collaboration across health, labour, and occupational systems.

We call on Member States to:

- Prioritize multisectoral collaboration for health promotion and well-being.
- Engage employers and workplaces in integrated health promotion initiatives inclusive of oral health.
- Invest in research and programmes to identify scalable models for health promotion and well-being.

Thank you.
