Specialist oral care by dentists and specialists

Advanced oral care provided by dentist (may be first entry level to formal healthcare system in settings with more resources)

Basic oral healthcare services – first entry level to formal healthcare system (provided by non-dentist personnel in low-resource settings)

Informal community care and traditional medicine (self-help groups, community health programmes involving non-health professionals)

Self-care and prevention
- Maintaining oral hygiene
- Using fluoride toothpaste
- Avoiding risk factors to oral health

The Challenge of Oral Disease – A call for global action by FDI World Dental Federation.
