

Making prevention a priority

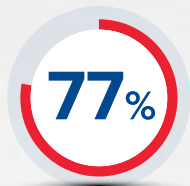

# Key lessons

## from the evaluation of the Caries Prevention and Management Chairside Guide

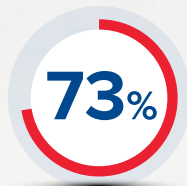

The CPP survey on the *Caries Prevention and Management Chairside Guide* polled oral health professionals (OHPs) on their overall perception of the guide and measured how helpful it is as a tool within dental practices. 330 OHPs from 88 countries participated.

### Informative and useful

Survey results indicate that the guide is most beneficial for OHPs with less than 10 years of experience in their current role. OHPs report that they use the guide to communicate with their patients and empower them to improve their oral care habits. This is how OHPs responded:

FIND IT INFORMATIVE & USEFUL

SAY IT HELPS THEM ADOPT A PREVENTIVE APPROACH BASED ON AGE

SAY IT SUPPORTS DECISION-MAKING ON CARIES MANAGEMENT

### Facilitates communication between patients and OHPs

With the guide, patients better understand my advice

A remarkable educational tool

Includes patients in the treatment planning process

Motivates patients to manage and prevent dental caries

Distills my philosophy of care into two A4 pages

Very helpful tool to communicate with patients
